- ✦ Even - **devops...**

*Did you hear
other names?*

The Questions

The Questions

- **Am I** a Full Stack developer?

The Questions

- ✦ **Am I** a Full Stack developer?
- ✦ **Do I need** to be a full stack developer?

The Questions

- ✦ **Am I** a Full Stack developer?
- ✦ **Do I need** to be a full stack developer?
- ✦ **What does it take** to become one?

The Other Questions

The Other Questions

- ✦ Who needs **Full Stackers**?

The Other Questions

- ✦ Who needs **Full Stackers**?
- ✦ why not **Domain Experts**?

The Other Questions

- ✦ Who needs **Full Stackers**?
 - ✦ why not **Domain Experts**?
- ✦ How do I **recognize** a fullstacker when I see one?

Questions to YOU

- What do **you** want to do when you grow up?

About ME

*From bits in the DB
to bits in PNGs*

On average day I deal with:

CSS

Javascript. In the browser. And on the server

Bits and compression in the database

Deployment automation

Monitoring and alerting

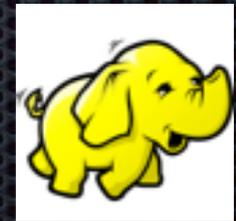

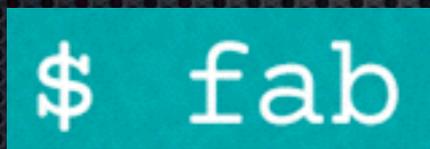

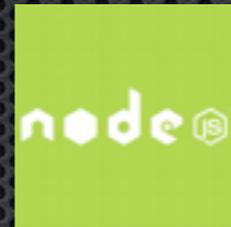

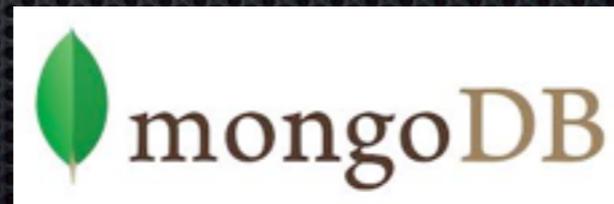

Objective-C

Java

Objective-C

Things I Like

- ✦ Understanding the whole picture
- ✦ Shipping
 - ✦ Shipping Code
 - ✦ Shipping Products that work
- ✦ Getting recognized for my work

Things I Like

- ✦ Understanding the whole picture
- ✦ Shipping
 - ✦ Shipping Code
 - ✦ Shipping Products that work
- ✦ Getting recognized for my work

Hint: That's why I do **Yodas**

Things I Dislike

- ✦ Throwing code at someone else to run it
- ✦ Having heard from someone else that:
 - ✦ **Hey dude, your code just fucked up**
- ✦ Being a small component in a large machine

Being a Full Stack

Being a Full Stacker

- ✦ You understand the whole picture
 - ✦ From user entering text in a box
 - ✦ To server transacting on a DB
 - ✦ To browser rendering back the response
 - ✦ *** To some extent of depth ***

Being a Full Stack

- ✦ You understand the whole picture
 - ✦ From user entering text in a box
 - ✦ To server transacting on a DB
 - ✦ To browser rendering back the response
 - ✦ *** To some extent of depth ***
- ✦ **And you love it!**

Being a Full Stack

- ✦ You understand the whole picture
 - ✦ From user entering text in a box
 - ✦ To server transacting on a DB
 - ✦ To browser rendering back the response
 - ✦ *** To some extent of depth ***
- ✦ **And you love it!**

Example: [what-happens-when](#)

What happens when you
type google.com

What happens when you type google.com

- The "g" key is pressed

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out
- Interrupt fires [NOT for USB keyboards]

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out
- Interrupt fires [NOT for USB keyboards]
- (On Windows) A WM_KEYDOWN message is sent to the app

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out
- Interrupt fires [NOT for USB keyboards]
- (On Windows) A WM_KEYDOWN message is sent to the app
- (On OS X) A KeyDown NSEvent is sent to the app

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out
- Interrupt fires [NOT for USB keyboards]
- (On Windows) A WM_KEYDOWN message is sent to the app
- (On OS X) A KeyDown NSEvent is sent to the app
- (On GNU/Linux) the Xorg server listens for keycodes

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out
- Interrupt fires [NOT for USB keyboards]
- (On Windows) A WM_KEYDOWN message is sent to the app
- (On OS X) A KeyDown NSEvent is sent to the app
- (On GNU/Linux) the Xorg server listens for keycodes
- Parse URL

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out
- Interrupt fires [NOT for USB keyboards]
- (On Windows) A WM_KEYDOWN message is sent to the app
- (On OS X) A KeyDown NSEvent is sent to the app
- (On GNU/Linux) the Xorg server listens for keycodes
- Parse URL
- Is it a URL or a search term?

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out
- Interrupt fires [NOT for USB keyboards]
- (On Windows) A WM_KEYDOWN message is sent to the app
- (On OS X) A KeyDown NSEvent is sent to the app
- (On GNU/Linux) the Xorg server listens for keycodes
- Parse URL
- Is it a URL or a search term?
- Check HSTS list

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out
- Interrupt fires [NOT for USB keyboards]
- (On Windows) A WM_KEYDOWN message is sent to the app
- (On OS X) A KeyDown NSEvent is sent to the app
- (On GNU/Linux) the Xorg server listens for keycodes
- Parse URL
- Is it a URL or a search term?
- Check HSTS list
- Convert non-ASCII Unicode characters in hostname

What happens when you type google.com

- The "g" key is pressed
- The "enter" key bottoms out
- Interrupt fires [NOT for USB keyboards]
- (On Windows) A WM_KEYDOWN message is sent to the app
- (On OS X) A KeyDown NSEvent is sent to the app
- (On GNU/Linux) the Xorg server listens for keycodes
- Parse URL

How to be a fullstacker?

What does it take?

How to be a fullstacker?

- ✦ Step 1:
 - ✦ Be an **expert** in one domain

How to be a fullstacker?

- ✦ Step 1:
 - ✦ Be an **expert** in one domain

(DNS)

How to be a fullstacker?

- ✦ Step 2:
 - ✦ Be an expert in one **more** domain

How to be a fullstacker?

- ✦ Step 2:
 - ✦ Be an expert in one **more** domain

How to be a fullstacker?

- ✦ Step 3:
 - ✦ Be an expert in **yet** one more domain

How to be a fullstacker?

- ✦ Step 3:
 - ✦ Be an expert in **yet** one more domain

Prototype.js

How to be a fullstacker?

- ✦ Step 4:
 - ✦ Do a few things casually.
 - ✦ Not expert level
 - ✦ Different domains
 - ✦ Different expertise
 - ✦ **Step out of your comfort zone**

How to be a fullstacker?

- ✦ Step 5:
 - ✦ Profit. You're now a **fullstack motherfucker**

How to be a fullstacker?

- ✦ Tools and techniques
 - ✦ Participate in several out of band projects
 - ✦ OSS is best
 - ✦ Deliberately **step out of your comfort zone**, again and again. On the job and out of band
 - ✦ Read, read, and more read

Example: My reading list

- ✦ Devops Weekly
- ✦ JavaScript weekly
- ✦ NoSQL weekly
- ✦ Webdesigner depot
- ✦ Web Operations weekly
- ✦ HTML5 weekly
- ✦ Software Lead weekly
- ✦ Hacker Newsletter
- ✦ Github Explore
- ✦ StackShare weekly
- ✦ Meteor forums digest

I even sum it up publicly

Bumpers

Learn, learn and more learn

The Coursera logo, featuring the word "coursera" in a blue, lowercase, sans-serif font with a white outline, set against a white rectangular background.The edX logo, featuring the letters "ed" in pink and "x" in blue, with a grey "d" in the middle, set against a white rectangular background.

SKILLSHARE

The Udemy logo, featuring the word "udemy" in a green, lowercase, sans-serif font.The Code School logo, featuring the word "code school" in a grey, lowercase, sans-serif font, with a blue and orange double-headed arrow symbol between "code" and "school". Below it, the tagline "learn by doing" is written in a smaller, orange, lowercase, sans-serif font.

Becoming a Full Stack

Disclaimer

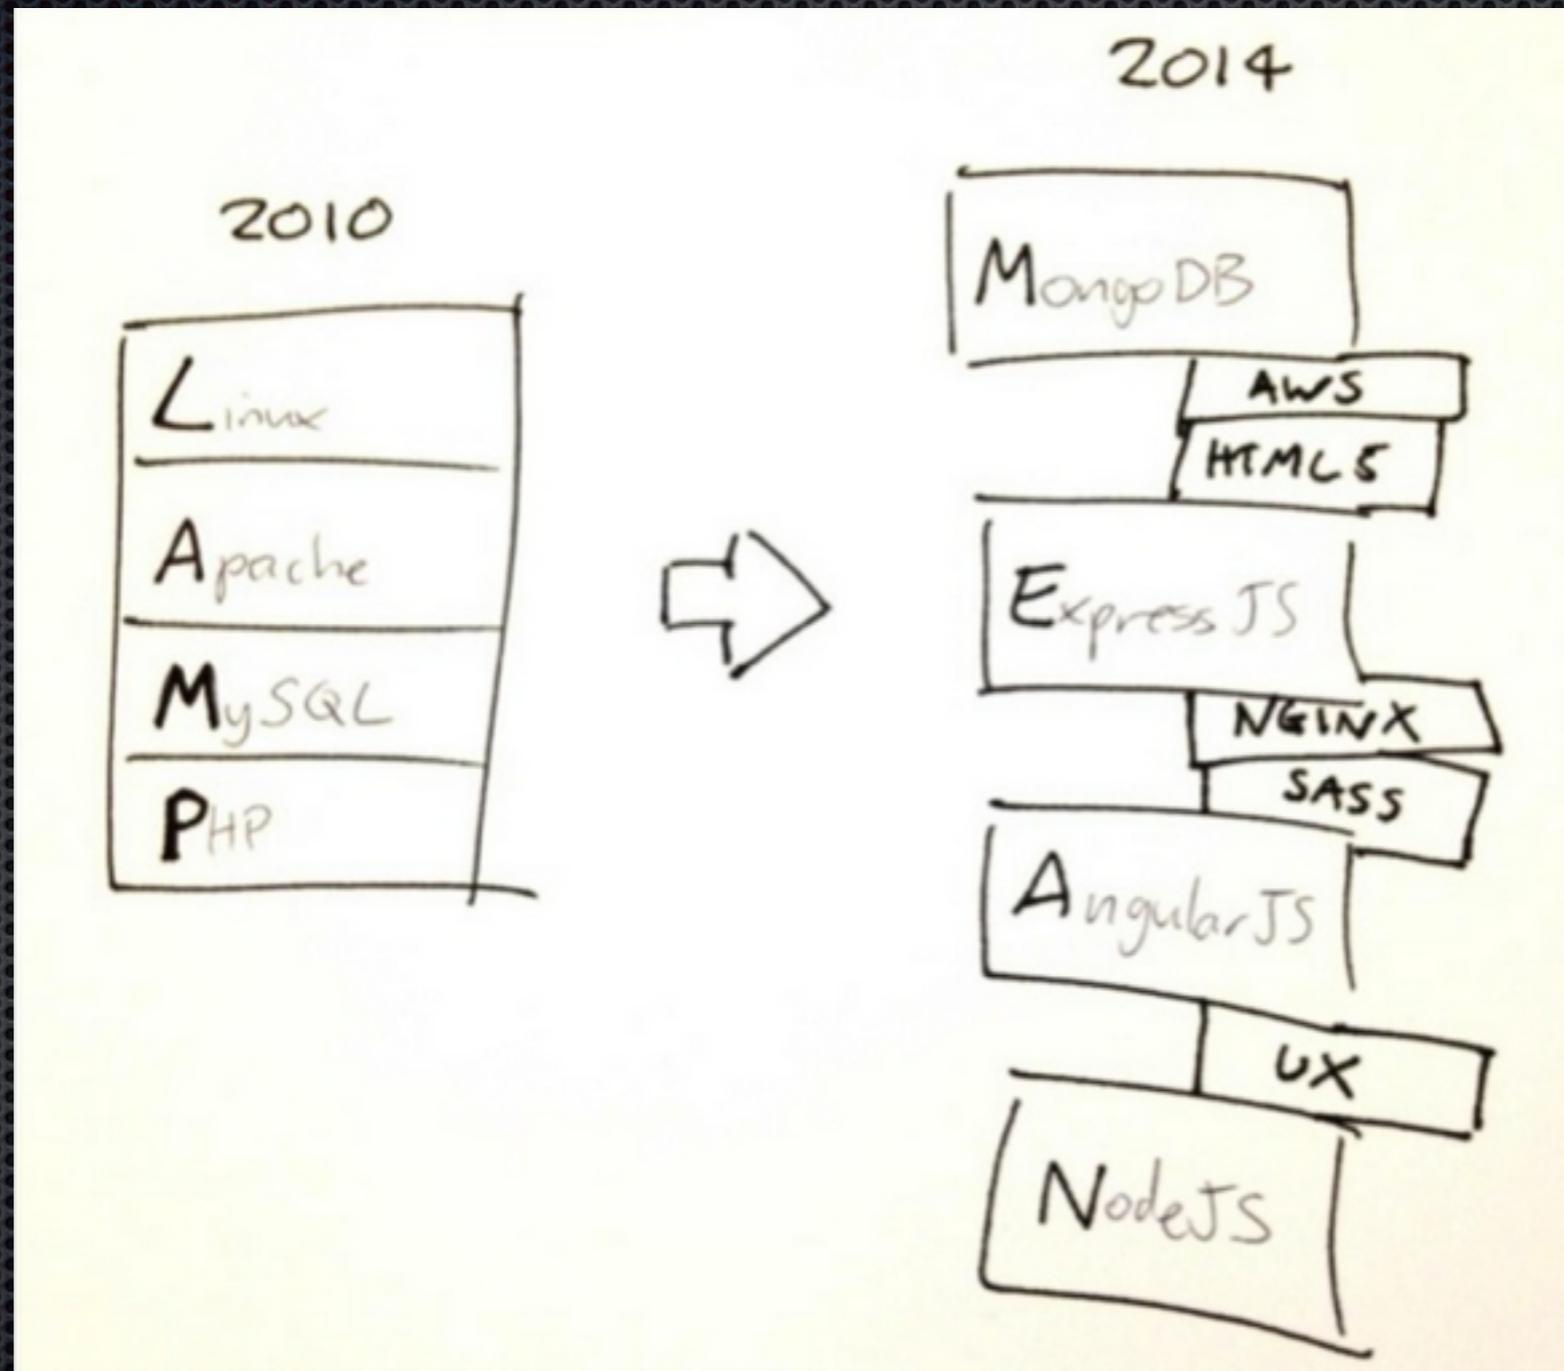

- ✦ You can be expert at one or two fields. Maybe three.
 - ✦ **Accept it**
 - ✦ You cannot be an expert in all
 - ✦ *Remember the saying:*
 - ✦ *Jack of all trades, **master of none.***

Fullstack is not for everyone

- ✦ Are you a Raccoon or a Koala?
 - ✦ **Raccoon eats everything**
 - ✦ yes, even garbage
 - ✦ Koala eats only eucalyptus

It is challenging

Why you might want to become fullstacker?

- ✦ Teams tend to be smaller and smaller
- ✦ Many startups just need generalists to get things done.
 - ✦ OTOH if you work for larger companies, you might benefit from specialization.

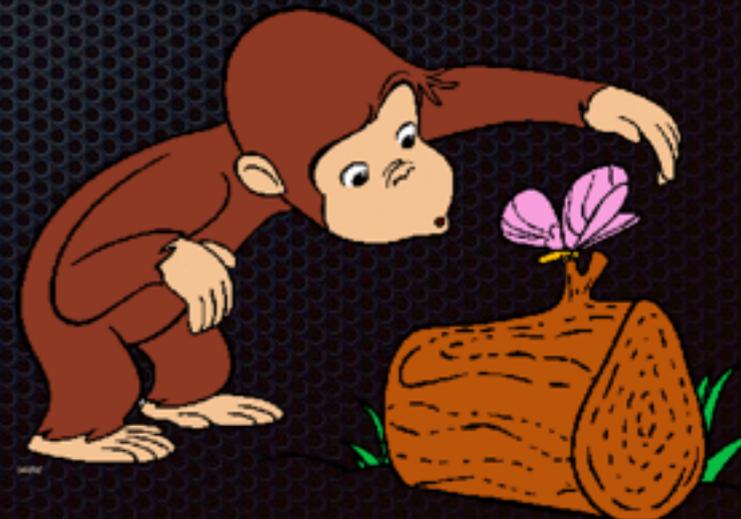

Characterizing fullstackers

- ✦ By nature full stackers are **seniors**
 - ✦ They just had to do so many things before

Characterizing fullstackers

- ✦ They are **curious**
 - ✦ They want to step out of their comfort zone
 - ✦ They might have a listening disorder...
 - ✦ This might just even be an advantage...

My personal story

- Desktop dev @ low-tech (boxes factory)
- Web dev @ a startup
- Security @ Microsoft
- Web frontend @ a startup
- Web frontend @ google. And backend...
- Backend @ outbrain. And frontend
- Infrastructure @ outbrain
- Then infrastructure. And dev. All sorts. In many companies...

So I asked myself: **What am I?**

- ✦ Am I a frontend dev?
- ✦ A backend dev?
- ✦ Both?
 - ✦ That tends to get HR and project managers really confused, BTW...
 - ✦ My manager even said: **You have to decide!**
- ✦ The term fullstack didn't exist yet
- ✦ **So what am I?**

What am I?

- ✦ Me: I am both a fronted and a backend. And Infra.
 - ✦ **Why can't I be both?**

Back to the questions

Back to the questions

- **Am I** a Full Stack developer?

Back to the questions

- ✦ **Am I** a Full Stack developer?
- ✦ **Do I need (or want)** to be a full stack developer?

Back to the questions

- ✦ **Am I** a Full Stack developer?
- ✦ **Do I need (or want)** to be a full stack developer?
- ✦ **What does it take** to become one?

Back to the questions

- ✦ **Am I** a Full Stack developer?
- ✦ **Do I need (or want)** to be a full stack developer?
- ✦ **What does it take** to become one?
- ✦ Can you answer them now?

Across industry

- ✦ Originally the term meant: **Full stack Web dev**
- ✦ But now we see:
 - ✦ Fullstack **Product Manager**
 - ✦ Fullstack **Designer**
 - ✦ Fullstack **Devops**
 - ✦ Fullstack **Marketer**
 - ✦ Fullstack **Motherfucker**

Proportions

- ✦ Is fullstack
 - ✦ Web FE-BE?
 - ✦ Web FE, BE + ops?
 - ✦ Web FE, BE, ops + mobile?
 - ✦ Web FE, BE, ops, mobile + design?
 - ✦ Web FE, BE, ops, mobile, design + hardware?...

Proportions

Another way to look at it

Basically when people are asking for a full-stack programmer they're looking for the all-singing, all-dancing technical wizard.

Or at least **someone who won't complain too much when asked to do some work outside their normal comfort zone.**

<http://qr.ae/RHhys9>

Inspiration

- ✦ A true full stack developer must be able to mine silicon from raw ore & also pilot a quadcopter to deliver a taco a mile away / @complex

Inspiration

- ✦ If you are having fun, enjoy technology and building new things, **there is really no expiration date on software engineers.** (Jeff Nelson)
